

3. Land Area

Before the reorganization, the City covered an area of 6,698 hectares, equivalent to a quarter of the present City area. In July 1968, the scope of the City was expanded to include six nearby towns and townships: Neihu, Nangang, Muzha, Jingmei, Shilin and Beitou, covering the area of 20,516 hectares; therefore, the total area was expanded to 27,214 hectares. There were consecutive minor adjustments in 1983, 1986 and 1992 respectively.

In August 1992, owing to the adjustment of demarcation line between Taiwan Province and Taipei City in Neigou and Dakeng Stream, the area of Taipei City increased 2.56 hectares of that at the end of 1991. At the end of 2016, Taipei City occupied 27,180 hectares (equivalent to 271.80 square kilometers) accounting for 0.75% of 3,601,373 hectares in Taiwan area.

Until the end of 2016, the registered land covered an area of 26,085 hectares, occupying 95.97% of the entire City. Of the registered land, 12,601 hectares or 48.31 % were public land; 12,304 hectares or 47.17% were private land; 1,180 hectares or 4.53 % were public-and-private land.

Land Area in Taipei City

Unit: Hectare

End of Year & District	Grand Total	Registered Land				Unregistered Land
		Total	Public ①	Private	Public-and-Private	
1968	27,214	22,098	5,478	16,620	...	5,117
